

## Bringing Vibrance to every Plastic Creation

### About Us

- **Welcome to Axco Industries (Pty) Ltd**, a leading manufacturer of premium Plastic Colour Masterbatches and Compounds. Our company is located in the Pretoria. Since our inception, we have been committed to delivering high-quality and sustainable colour solutions for the plastic industry.
- At **Axco Industries (Pty) Ltd**, we utilize cutting-edge technology, state-of-the-art equipment, and **high-quality raw materials** to produce our products.
- Our Plastic **Colour Masterbatches** are formulated with the best pigments and polymer additives, producing uniform dispersion and consistent colour.
- Our Plastic Compounds, on the other hand, are customized to meet the specific requirements of our clients.

## Our Vision

Our vision is to be a leader in the plastic colour industry, delivering innovative and sustainable solutions, while maintaining the highest standards of quality and customer satisfaction.

## Our Values

We are guided by our values of Integrity, Quality, Innovation, and Sustainability. As a company, we strive to maintain the highest level of professional ethics, providing products that meet industry standards. Our commitment to innovation ensures that we remain relevant and competitive in the ever-evolving market, while our focus on sustainability ensures that our products are not only eco-friendly but also socially responsible.

## Our Mission

Our mission is to provide our clients with high-quality and eco-friendly colour solutions that cater to their individual requirements. Our team of experts works closely with our clients to understand their business needs, providing tailor-made solutions that are reliable, durable and competitively priced.

INDUSTRIES

## Our Products

Our high-quality products are perfect for a range of industrial sectors, including packaging, toys, automotive, consumer products, and construction. We pride ourselves on providing superior color consistency, process stability, and durability with our top-of-the-line color masterbatches, additive masterbatches, black and white masterbatches, and plastic compounds.

### ➤ Product Range:

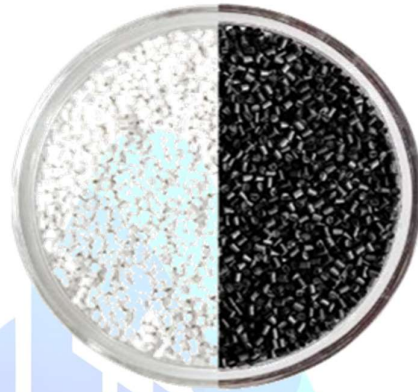

- o **Colour Masterbatch** - Our color masterbatch is perfect for coloring your plastic products with beautiful, vibrant, and durable colors. Choose from our wide range of colors or let us develop a custom solution that meets your unique needs.

- o **Additive Masterbatch** - Our additive masterbatch enhances the functionality of your plastic products; we offer various grades of anti-block, anti-foam, anti-static, anti-microbial, and UV stabilizer.

- o **Black and White Masterbatch** - Our black and white masterbatches are perfect for coloring your plastic products with monochromatic shades of gray, black, or white while maintaining their durability.

- o **Plastic Compounds** - Our plastic compounds are suitable for the production of various specialized applications, such as electrical and electronic products, automotive parts, and construction applications.

INDUSTRIES

## Industries - we Serve

### ➤ **1. Toys:**

- o Our color masterbatch serves the toy industry with various applications. We follow strictly the requirements of the European standards EN 71 for toy safety. Thus we guarantee the highest colour safety.

### ➤ **2. Packaging:**

- o We offer customized colour and special effect solutions that meet the requirements of various packaging applications. Our products are designed to offer excellent processing stability, consistency, high temperature, and UV resistance which enhance the aesthetics and shelf life of products. They are suitable for use in food packaging, cosmetics packaging, household goods, and other consumer products packaging.

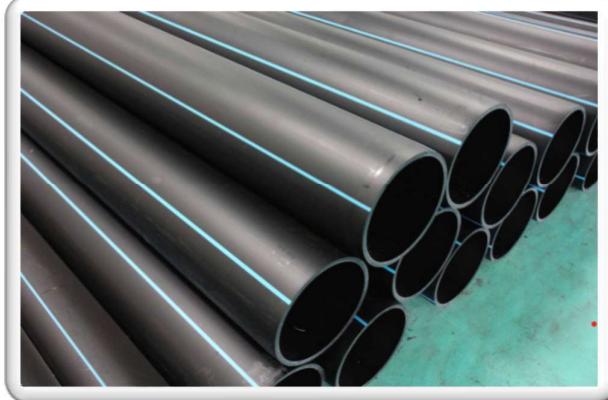

### ➤ **3. Home and Lifestyle:**

- o Our products are customized to meet the needs of home appliances, furniture, and other home and lifestyle products. We offer innovative solutions to improve aesthetic quality and functionality to products finishing while meeting the highest sustainability standards.

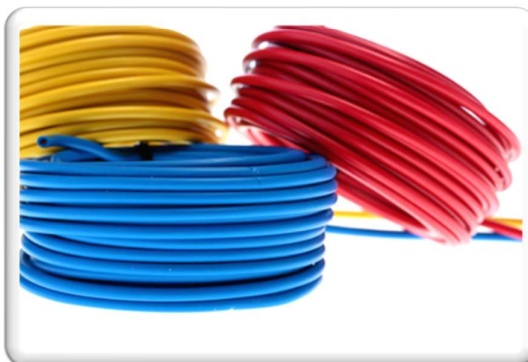

### ➤ **4. Building and Construction:**

- o We provide solutions for the building and construction industry that improve the durability, functionality and visual appeal of plastic-based products. Our products include color masterbatches, additives, and performance-enhancing compounds for Plastic Formworks, drainage pipes, window profiles, roofing membranes, and much more.

## ➤ **5. Wire and Cables:**

- o Our plastic color and additive solutions meet the high-level demands of the electrical wire and cable sector. Our products offer excellent thermal stability, conductivity, and flame-retardancy, ensuring safety and optimal performance.

## ➤ 6. Electronics:

- o We provide plastic colour and additive solutions for electrical components, power distribution systems, electronic casings, sensor housings, and much more. Our products are customized to meet the high-level requirements of electrical conductivity, durability, and flame-retardancy.

## ➤ 7. Agriculture:

- o We provide a range of plastic colour and additive solutions that cater to the needs of agricultural applications. Our products improve functionality, durability, and visual appeal for agricultural products, nursery trays, greenhouse films, irrigation pipes, and more. They also offer excellent UV and thermal stability.
